Since the 2004-05 year, the first year all high school students were considered dual enrollment students, a shift has developed from the dominance of Arts & Sciences offerings toward Business Technology offerings from earlier years, with Arts & Sciences falling 10+% while Business Technology increased around 10% from the 2004-05 year. The remaining four divisions have ranged from 6% to 11% combined in the five-year period.

Most dual credit students come from Wise and Scott County high schools. As the number of dual enrollment students increases, the percentages have stabilized and have moved toward the percentages of total students from the service region jurisdictions. In the past five years, Scott County enrollments have increased while Wise County enrollments have declined.
